CABLE TESTING

</div>

The Laird LTM-CTBQ is easy to use. Simply insert cable ends into the corresponding connectors. The **TEST OK** LED will illuminate indicating that the cable has passed.

Note: This tester will only test for standard manufactured cables on a "go" or "no-go" basis. It will not test for cross-wiring or internal shorts typical of custom cables.

<div align="center">

CHANGING THE BATTERY

</div>

Remove the top panel battery compartment cover as shown in Figure 1 using a small Phillips head screwdriver. Use a standard flat head screwdriver to lift out battery. Replace 9V battery and cover.
